Switch On art space presents, in collaboration with Video Art Festival Miden, **Switch on/Switch off**, a group exhibition about light.

The exhibition focuses on handling light as the basic form-making production medium of art projects that act as self-illuminating in darkness: Photos, light sculptures, installation and video projections -a medium physically and conceptually related to light- coexist in a dark space, creating discrete “light paths”, literally and metaphorically, in an artistic discourse exploring different aspects of light in art.
